

Contracting with Global Technical Systems (GTS) Using GSA Professional Services Schedule GS-00F-285DA

ONE CONTRACT FOR A MULTITUDE OF SOLUTIONS

Introduction

Management Services Group, Inc., doing business as (dba) [Global Technical Systems \(GTS\)](#), is a *Woman-Owned Small Business (WOSB)* possessing extensive experience providing innovative, cost-effective, high-tech engineering products and product-based services encompassing latest generation software and hardware solutions and engineering services for defense, homeland security and other critical Government interests. Our expertise in advanced technologies generates products and services across a spectrum that includes: mission-critical combat systems processing, C4ISR, advanced radar and sensor systems including stealth radar technologies (L-Band to W-Band), biometrics, cyber security, composite warhead and flywheel designs/technologies and depot repair and logistics. Core competencies include: hardware/ software system design, development and test, limited and full production. Engineering efforts include evaluation, selection, procurement and integration for new-build and upgrade.

GTS PSS Contract GS-00F-285DA

[GTS's Professional Services Schedule \(PSS\)](#) provides the Federal Government with a fast and efficient procurement vehicle to obtain our services. The PSS schedule is available to all Federal Government agencies and covers the Contract Scope/Special Item Numbers listed below.

Online access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order is available through [GSA Advantage!®](#) a menu-driven database system.

[Basic Schedule ordering guidelines](#) provide useful information to start ordering from GSA Schedules.

Period of Performance: September 15, 2016 – September 14, 2021 (Base Period)

Contract Scope/Special Item Numbers:

- 871-3 System Design, Engineering and Integration
- 871-4 Test and Evaluation
- 871-5 Integrated Logistics Support
- 871-6 Acquisition and Life Cycle Management

Labor Categories Available:

- Program Manager
- Chief Scientist
- Engineer 3
- Engineer 2
- Engineer 1
- Systems Engineer
- CAD Designer
- Chief Information Security Officer
- Configuration Management Specialist
- Applications Developer
- Database Management Specialist
- Information Technology Administrator
- Production Supervisor
- Integrated Logistics Support Manager
- Quality Assurance Manager
- Receiver, Material Handler
- Assembler
- Engineering Technician
- Program Administrator
- Administrative Assistant

Contracting with Global Technical Systems (GTS) Using GSA Professional Services Schedule GS-00F-285DA

ONE CONTRACT FOR A MULTITUDE OF SOLUTIONS

Professional Services Schedule (PSS) Overview

The [Professional Services Schedule \(PSS\)](#) offers customers the ability to meet acquisition challenges while achieving their missions. This Multiple Award Schedule (MAS) provides a streamlined, effective commercial contracting vehicle for both customers and vendors using FAR 8.405 ordering procedures. As part of this effort, the Professional Services Category consolidated the following professional-services Schedules into a single PSS contract. PSS gives federal agencies the ability to use a single long-term, government-wide contract to procure simple to complex fixed-price, time and materials, or labor-hour professional services. All PSS Contracts are awarded with a 5-year base period and three 5-year option periods. Task orders must be solicited and awarded prior to the PSS contract expiring and may extend up to 5 years after the PSS contract expires.

GSA created the single PSS to give federal-agency acquisition professionals the ability to obtain total contract solutions for their professional-services needs using a single contract vehicle. Agencies have access to the same professional services as before – but in an easier-to-use contract environment. Also, for both industry and GSA, PSS eliminates significant contract duplication and workload previously associated with negotiating, administering, and auditing multiple contracts.

Why Use the PSS?

PSS gives federal agencies the ability to use a single contract to procure simple to complex fixed-price or labor-hour professional services. When using PSS to acquire the professional services, agencies can:

- Use simplified acquisition procedures to issue a Request for Quotation (RFQ) using either your agency's solicitation system or GSA's [eBuy](#) solicitation system, or issue an RFQ directly to contractors using your agency's procedures.
- Allow unique [Contractor Team Arrangements](#) to bring a wide variety of industry partners to the negotiating table.
- Customize terms and conditions in task orders – or through Blanket Purchase Agreements – to meet specific requirements.
- Be assured that required FAR terms and conditions are incorporated into the contract.
- Ensure adequate participation by small businesses, including setting aside RFQs for various socioeconomic subgroups.
- Save time by using the streamlined procurement procedures of FAR Subpart 8.4.

Streamlined Procurement Procedures

To access PSS, visit GSA's [eLibrary](#), and select "00CORP" in the "Quick Search" dropdown box on the right-hand side of the page. Once you've decided which services you need, you can use GSA's [eBuy](#) to electronically post and receive quotations in a secure environment.

Other resources that can help you properly use GSA Schedules include:

- FAR Subpart 8.405 (ordering procedures for Federal Supply Schedules)
- GSA's MAS desk reference guide
- GSA Schedules ordering guidelines
- GSA's online training resources

Who Can Order through the Professional Services Schedule?

All federal and appropriately warranted Contracting Officers are authorized to award task orders against PSS.
